Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 14-24, drawn to a method comprising: obtaining an agent prepared from plant seedlings enriched with electrolytes comprised in a pharmaceutical preparation; and administering the preparation to a non-immune-suppressed person; wherein the administration of the preparation results in proliferation of T-lymphocytes in the person.

Group II, claims 25-30, drawn to a method comprising: obtaining an agent prepared from plant seedlings enriched with electrolytes comprised in a pharmaceutical preparation; and administering the preparation to a person; wherein administration of the preparation results in reduction of blood cholesterol concentration in the person.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I is drawn to a method comprising: obtaining an agent prepared from plant seedlings enriched with electrolytes comprised in a pharmaceutical preparation; and administering the preparation to a non-immune-suppressed person; wherein the administration of the preparation results in proliferation of T-lymphocytes in the person, whereas the Invention of Group II is drawn to a method comprising: obtaining an agent prepared from plant seedlings enriched with electrolytes comprised in a pharmaceutical preparation; and administering the preparation to a person; wherein administration of the preparation results in reduction of blood cholesterol concentration in the person. The method of Group I is not related to the method of Group II because the methods recited different method steps and, therefore, provide two completely distinct methods. A search for the method of Group I is not co-extensive with a search for the method of Group II. See MPEP § 1839.03 [R3].

Art Unit: 1655

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I:

Specie A: one result of administration of the preparation from Claim 15, 16, 17, 18, 19, 20 or 22.

If Claim 22 is elected as Specie A, further elect either atherosclerosis, myocardial infarct or apoplexy from Claim 22.

Group II:

Specie A: one result of administration of the preparation from Claim 26, 27 or 28.

If Claim 27 is elected as Specie A, further elect either atherosclerosis, myocardial infarct or apoplexy from Claim 27.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1655

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Group I:

Specie A: Claim 15 is drawn to Claim 15, Claim 16 is drawn to Claim 16, Claim 17 is drawn to Claim 17, Claim 18 is drawn to Claim 18, Claim 19 is drawn to Claim 19, Claim 20 is drawn to Claims 20 and 21, Claim 22 is drawn to Claim 22.

Group II:

Specie A: Claim 26 is drawn to Claim 26, Claim 27 is drawn to Claim 27, Claim 28 is drawn to Claim 28.

The following claims are generic: Claims 14, 20 and 25.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The effects of the preparation in claims 15, 16, 17, 18, 19, 20 and 22 and in claims 26, 27 and 28 are distinct both physically and functionally from each other and a search for one effect is not co-extensive with a search for another.
